PREMIER COFFINS

At JC Atkinson we know your reputation is everything, which is why we are committed to providing you with the highest quality, ethically manufactured products on the market while and exceptional levels of customer service. We have achieved and maintain the following independent certifications and accreditations.

FFMA is run to Coffin Certification Standard, where coffins and caskets are tested to ensure best standards and impartiality are applied. The FFMA is a link between manufacturers/suppliers, the Funeral Director and the crematoria. To ensure coffins/caskets are fit for purpose, they are tested to make sure there are no problems with handling, safety, pre-ignition, combustion and ash volume. All coffins within this catalogue have passed the tests.

Winner of *The Sunday Times* Best Green Company 2008, the benchmark for environmental excellence against which companies are able to measure their own performance year-on-year and to compare with other businesses operating at a similar level of environmental impact.

ISO 14001 standard, the internationally recognised mark for the environmental management of businesses. It prescribes controls for those activities that have an effect on the environment. These include the use of natural resources, handling and treatment of waste and energy consumption.

The Forest Stewardship Council (FSC) is a non-profit, non-governmental organisation dedicated to promoting responsible management of the world's forests. It was founded in 1993 in response to public concern about deforestation and demand for a trustworthy wood-labelling scheme. Our products use wood sourced from well managed, sustainable sources and, where a wood type is threatened, we use FSC wood. Woods such as oak are often grown sustainably. We source only from areas with managed oak forests, including the USA.
